

Internet Catalog Server

This is the end of catalog updating! Our new catalog server gives you access to even more catalogs without having to download them. Also, **AB Magique's** automatic updating system keeps your software ready with the latest software version.

Internet Networking: Bridging AB Magique Customers and Suppliers

And that's not all! **AB Magique** connects users via the Internet. Customers or suppliers can now complete commercial transactions using the Web.

Business clients can now download the free «**ABMagiqueClient**» software. This program allows your clients to download their vehicle repair account, view real-time estimates and account statements.

Link Integration

With its incredible link integration with ProLink, DAVE and Weblink II (more to come), the repair shops can now verify the availability of stock on-line at their parts distributor, report the information on their estimates or purchase orders and order on-line – in just a few seconds!

Our Technical Support

Our bilingual technical support team is ready to assist you with product support so you can be rest assured and worry free.

AB Magique – Proud Follower of InfoCat.

AB Magique is the result of more than 12000 hours and three years of software development. Its creation has been inspired after our number one selling product in Canada: InfoCat.

For current customers of InfoCat that would like to switch to **AB Magique** we offer a conversion utility.

Current InfoCat customers are reassured that we will continue to provide technical support and product updates. We simply offer two great products!

Better Business Through Better Software

AB Magique

« This software is the most effective, user friendly and most certainly, the least expensive on the market! So many wonderful surprises await you at the click of your mouse! But the most spectacular has to be its MDI Interface (Multiple Document Interface). »

— Alain Bousquet, President

* AB Magique requires Microsoft Windows XP Professional or Vista Operating System.

AB Magique produces considerable results for every user because of its MDI Interface inspired by «Word» and «Excel». **AB Magique** offers the possibility to organize your computer screen into a true professional service management unit.

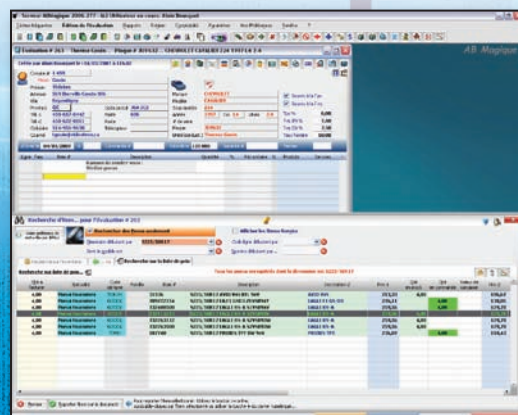

Your computer will become an incredible managing tool. You will be able to prepare estimates to invoices without any error risk. This new program processes daily operations at the speed of light with great ease.

Innovation at your service...

With it's groundbreaking «drawer effect» windows showing:

- The appointment grid
- Vehicle repair history
- Search on inventory and price lists
- Pending estimates listing
- Pending purchase orders listing
- Labor time clock listing
- Counter sales invoicing

You will be able to accomplish your frequent daily tasks simply and automatically.

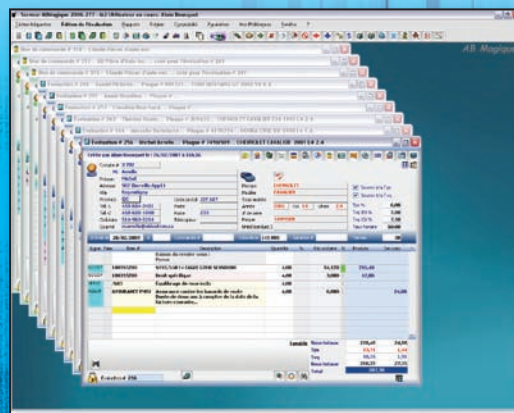

AB Magique can open over 75 estimates simultaneously with computers equipped with 2 GB RAM.

Effective Multiple Document Interface (MDI)...

You can now view the following windows simultaneously, whether you are creating an estimate or a purchase order:

- A customer's account
- A supplier's account
- Client's history
- Supplier's history
- Accounts receivable
- Accounts payable
- Your accounting
- Entering a new appointment
- Consulting your inventory
- Or any other consultation;

There is no need to close and re-open your estimate or your purchase order: with a simple magical click, the information you need appears.

Panoramic View: The Panoramic Window

With a simple mouse click you can look over the results of your commercial operations using the five tabs in the panoramic window. Select the period of your choice and view the results...

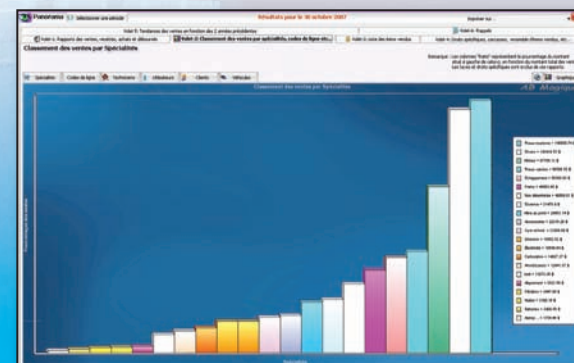

Tab 1: Detailed reports of sales, income, purchases and disbursements.

Tab 2: Sorting sales by specialties, line codes, technicians, users, clients or vehicles.

Tab 3: Lists of every item sold with its detailed history of sale and purchase.

Tab 4: Lists of specific duties sold, cores, groups of items, etc...

Tab 5: Sale trends compared to previous years.

Magnificent charts pop up when you browse through these tabs.
